Comments: UAA survey occurred in March 2005 and no uses were observed. The stream met the maximum depth criterion in one out of four sites and average depth criterion at two out of four sites. The stream flowed through parks and playgrounds and there were footprints and ATV tracks along the stream banks. There is not enough evidence to rebut a whole body contact designation. Extensive interviews and/or historical information were not provided.

Committee Recommendation: ☒ Retain Use ☐ Modify Use ☐ Remove Use
